TIM MALONEY

BIOS & INTRODUCTIONS

ONE-LINER — 15 WORDS

Tim Maloney helps organizations remove the friction from technology risk so they can move faster.

PROGRAM LINE — 27 WORDS

Tim Maloney is a Director at Protiviti, where he leads a national team that helps organizations remove the friction from technology risk so they can move faster.

SHORT BIO — 80 WORDS

Tim Maloney is a Director at Protiviti, where he leads the US Technology Risk, Governance and Enablement practice. For more than 20 years, he has helped organizations build technology risk, governance, policy and compliance programs that people actually use. His view is simple: good governance should make the right path the easy path. Outside of work, Tim is an Eagle Scout and Scoutmaster of Troop 457 in Zelienople, PA, and spends as much time on the trail as he can.

FULL BIO — 160 WORDS

Tim Maloney is a Director at Protiviti, where he leads the U.S. Technology Risk, Governance and Enablement practice. He helps organizations remove the friction from technology risk so they can move faster.

He has done this work since 2002 across a wide range of industries. His focus is IT governance, risk and compliance, along with the everyday processes that keep a strategy from falling apart. He has run IT and cybersecurity compliance programs for global companies, built risk frameworks from scratch, and turned governance reviews into roadmaps that leadership teams follow.

Tim believes good governance should make the right path the easy path. His talks and writing borrow a lot from the hiking trail: maps over checklists, switchbacks over shortcuts, and packing only what the trip requires.

Away from work, Tim is an Eagle Scout, Scoutmaster of Troop 457 in Zelienople, PA, and a merit badge counselor. He writes about technology risk and leadership on his Trail Map at tim-maloney.com.

INTRODUCTION · ABOUT 10 SECONDS

Our next speaker is Tim Maloney, a Director at Protiviti who leads its Technology Risk, Governance and Enablement practice. For more than 20 years, he's helped organizations remove the friction from technology risk so they can move faster. Please welcome Tim Maloney.

INTRODUCTION · ABOUT 30 SECONDS

Our next speaker has spent more than 20 years helping organizations get technology risk right.

He's a Director at Protiviti, where he leads the Technology Risk, Governance and Enablement practice across the US. He has run cybersecurity compliance programs for global companies, built risk frameworks from scratch, and helped leadership teams turn governance into roadmaps they actually follow.

His view is simple: good governance should make the right path the easy path.

He's also an Eagle Scout and a Scoutmaster, so don't be surprised if today's talk sounds a little like a hike. Expect maps, switchbacks, and a hard look at what's really worth packing.

Today he's here to talk about [TALK TITLE].

Please welcome Tim Maloney.

SIGNATURE TOPICS & FORMATS

Reading the Trail Map: technology risk with clarity

Most technology risk programs have plenty of maps and very little sense of where they're headed. This keynote walks the route from trailhead to summit to show how governance, risk and enablement pull together, and how a leader picks a path the team will actually follow. People leave with a plain way to explain risk decisions to colleagues who don't live in them.

Executives and general-session audiences KEYNOTE PODCAST

Governance that speeds you up

Governance gets blamed for slowing the business down, and sometimes it earns that. This talk is about structure: who holds which decision, how the Three Lines fit together, and how controls are designed so they create flow instead of friction. When the guardrails are clear, teams move faster.

CIOs, CISOs and risk leaders KEYNOTE PANEL WORKSHOP

Taking the friction out of enterprise technology risk

Ask a business owner about technology risk and you'll often hear about the same questionnaire arriving from three different teams. This session looks at how the work runs day to day: assessments, hand-offs, tooling and duplicated asks. Then it gets practical about cutting the effort, and the controls that have become dead weight, without cutting the protection.

Risk, compliance and IT audit leaders and their teams PANEL WORKSHOP PODCAST

Bridging business risk and technology risk

Business leaders talk about revenue, customers and reputation. Technology teams talk about vulnerabilities, outages and control gaps. Both are describing the same exposure in different languages. This talk shows how to connect the two, so technology risk shows up where business decisions get made and lands with the people who own the outcome.

WHAT YOU'LL TAKE AWAY · WHO IT'S FOR

WHAT AUDIENCES TAKE AWAY

- A plain way to explain risk decisions to people who don't live in them.
- Governance structured to create flow, not friction.
- Practical ways to cut duplicated risk work without cutting the protection.
- A shared language that connects business risk and technology risk.
- One thing to change at work on Monday.

WHO IT'S FOR

Executives and boards

CIOs, CISOs and technology leaders

Risk, compliance and IT audit teams

General-session conference audiences
